jaws of two sets of ponderous electric been accomplished through Democratic pieces fall upon an electric driven belt | Wealth. conveyor and are whisked away to another elevator, in which they are again carried up 65 feet to an electric pass, and are deposited in a huge coneshaped stock house. Thence they fall at the expense of the taxpayers. It is through the small end of the cone into 900 buckets, which are attached to an electric conveyor, and these carry the egg-size pieces of rock to three sets of

high-pressure rollers. Beneath the rollers the rock is gratiulated, ground as fine as sand, and thence, ofter passing through a series of screens, the granulated rock is transferred to the most wonderful part of the entire plant. This is the magnet miles of wire and stored with 750 volts of electricity.

In the magnet room the conveyor branches off in two directions, and as the junction is reached the slag sand, unaffected by the electricity, keep on a ico. During the last three years it is straight course, and is eventually estimated that Americans have invested dumped into the yard of the plant. \$83,265,000 and Englishmen \$27,950; But the minute particles of iron the 000 in Mexican mines. sand contains can't resist the force of the powerful electric current, and are deflected into a separate channel. Down this they dash to the "mixer."

In the "mixer" a chemical compound, of which only Edison and his chemists know the exact nature, is added, causing the iron particles to and CHOP HOUSE cling together and form a heavy, sticky latter place most of the miners are Mex-Entrance through Heron & Clark's Saloon, mass. This mass flows into the icans, Italians and Chinamen. "Pricker room," where forty machines, each capable of turning out sixty bricks a minute, press it into solid blocks of orator, "and what would follow?" "We concentrated iron ore, weighing sixteen would," said a man at the back of the ounces each. These pass into another audience, promptly,

The Evil Effects of a Boom.

The people who howl for a boom are not posted on booms, which have the same effect on communities that getting on a howling drunk does on individit lasts, but a bitter penalty to pay when the reaction sets in. There are always more hungry and desperate men in and around a boom town than equaled at a White House function. place where vast droves of human sheep flock to be preyed upon by a few hu man wolves, as devoid of compassion as a lamp post; fellows who pride themselves on their ability to down their fellow man with the same savage spirit which controls Siberian wolves when they devour any one of their own park which falls wounded by the wayside. There is seen in all its horrors the wild craze for gold which till the city and surroundings with thousands of monomaniaes quick to do or die for the possession of gold. There thousands of homeless men throng the streets and sleep like herds perstition. of hogs piled together on the saw dust and vermin-covered floors of the gambling halls, and when morning comes it is frequently the case that one or more of these sleepers has auswered the last call, through want and privation, and as the balance of the hungry herd seeks the open air, the dead bodies of the unknown and uncared for are thrown into a wagon and carted like dead animals beyond the corporate limits. Such is a boom town. Let us prefer a quieter community, where want is unknown and the better

tial growth is what Prescott wants .-Courier. Arizona Newspapers. Pollowing is a list of the newspapers

Gus Heyman's Mascot.

"What fools these mortals be."

One of the most popular of the knights of the grip who make Arizona their occasional tilting ground, is Gus Heyman. It may be half pint bottles of samples and it may be collars and socks, but his constant companion is a small valise to which is attached a tag, "No. 13," issued by Jake Abraham,

of Clifton, to his commercial visitor. The tag is notable among the coadsters as indicative of Heyman's natural bravery and contempt for su-

"Why, do you know," said Abraham, I tried to run out those valise tags peording to number, but when I got to 13 I stuck. No. 14 went all right, and though I offered the 13 to every man, over 100 went out before I could work off the supposedly unlucky number. And Heyman was pleased to take it. I really believe it a mascot, and not a hoodoo, to judge from Heyman's luck and sales.-Phoenix Republican.

Couldn't Trust Him. The tramp recognized in him a man about town, so tapping him on the el-

bow, said: "Say, mister, can't you give a poor devil 10 cents? I want to-now I'll be candid with you an' tell you the truth. I'm not starving an' I don't care whether I have a bed or not. I can can get grub an' lodgin's at the Salvavation Army life boat, but they don't keep booze there. I'm awful dry-you know how it is yourself to be that way. Can't you give me 10 cents to

get a drink?" He looked the tramp straight in the eye and then shook his head doubt-

fully. "No-no, I can't do it" said he. "I can't trust you. You might squander it for food."-S. F. Post.

It would pay some one who has the time and ability to get up a prospector's handbook, a compact little 100 pages, giving in handy shape some condensed practical points about practical mineralogy, ore, assaying, etc., says the Mining and Scientific Press. Every week there are two or three applications at this office for such a work. The Colliery Engineering Company, Scranton, Penn., some time ago published such a little work, written by a Colorado miner, which, though largely local in its nature, is meeting with

good sale. It is announced that the great Bruce photographic telescope, the largest in the world, will soon be shipped from the Harvard observatory in Cambridge to the branch of the observatory in Arequips, Peru. The telescope will first be shipped to New York, and there will be put on board of a South American steamer, which will take it direct to Mollendo, Peru. There it will be taken charge of by the Harvard men at the South America observatory, and will be conveyed by rail to Arequipa, a distance of about seventy-five miles. ramento river for gold.
